**My guitars are 100% crafted by hand under the strictest quality control and with a tradition spanning seven generations of guitar makers**

The eight generation of Carrillo guitars has adapted to the needs and demands of today's players by being at the front of integrating newest and traditional methods of construction.

Maintaining tradition and keeping up with times while servicing art and artists is paramount to our process in making our instruments.

The woods are selected using high standards of quality as well as its beauty, which makes each of the instruments unique in its looks and tonal characteristics.

Each guitar reflects a great amount of care only possible through a personal finishing touch by the hand of a master craftsman, thus a professional instrument, as well as a masterpiece.

**The success of my guitars is based on artisanal and traditional construction, while incorporating new construction techniques and the use of new materials**
