FLAMENCO GRAND CONCERT

Pasión India

Our “Pasión Flamenco” guitars have earned in their own right a space of honor among the most select of our flamenco guitar.

The internal construction system, together with extensive experience working with the elite of flamenco guitarists, has allowed us to develop unique features in our guitars. With a bright and percussive sound, its balanced power and depth are a hallmark, a characteristic mark of these instruments.

Its great power and projection provide security and protagonism to the guitarist, while its genuine sound, vibrant and jondo, allows fluid transitions between chopped electrics and deep alzapúas.

The guitarist feels that with a great sound projection, at the same time that he enjoys that moment.
